PROJECT TITLE: Core FinTech Ledger Node
TARGET DOMAIN: Cybersecurity | TYPE: Ledger Node
RISK LEVEL: Critical
TECH STACK: FastAPI, React, Docker, Solidity
CHECKED SAFEGUARDS: Security, Deployment, Compliance, Ethics

TECHNICAL ARCHITECTURAL PROPOSAL SPECIFICATIONS

We are launching a completely secure FinTech ledger node utilizing smart contracts. It guarantees 100% unbreakable security for client transactions and will always execute instantly. The node contains transaction audit logging, key lifecycle rotation, and rate limiting.
