

VOIDMAP AI · TEST CASE DOCUMENT

PROJECT TITLE: AlphaMed Chest X-Ray CNN [Robust 90%]

TARGET DOMAIN: Healthcare | TYPE: Medical AI

RISK LEVEL: High

TECH STACK: React, FastAPI, PyTorch, Docker

CHECKED SAFEGUARDS: Validation, Security, Ethics, Compliance, Monitoring

TECHNICAL ARCHITECTURAL PROPOSAL SPECIFICATIONS

AlphaMed robust diagnostic proposal. We have completed clinical validation trials on independent radiological datasets. Standard patient privacy is enforced with HIPAA-compliant data encryption and automatic demographic bias mitigation across patient age cohorts. We are preparing legal documents for the FDA / CE Regulatory Pathway and have integrated explainability networks providing radiologists with attention heatmap highlights.
